Papier Mache Fruit Bowl.

Made out of scrap paper follow the pictures to make this inexpensive bowl. All you need is a mould (we used a colander but anything of the desired shape will do) paste and old paper torn into strips. You can use old magazines or newspapers in the desired colour or alternatively paint before applying the final seal or lacquer. This craft has been practiced for 100's of years all over the World; the chinese were especially fond of it and you can still see some expertly crafted examples of their work in museums around the World.
